REACH (Registration Evaluation and Restriction of Chemicals) legislation was published on December 30, 2006, requiring all substances manufactured or imported into the European Union (EU), in excess of one tonne per year, to be registered with the European Chemicals Association (ECHA). The legislation entered into force, in all countries of the EU, as of June 1, 2007. Pre-registration began June 1, 2008 and continues until December 1, 2008. Registration deadlines vary depending on hazards and quantities, starting in 2010 and ending in 2018.

This posting is to confirm that American Refining Group Inc. has pre-registered all of its refinery produced streams and we are working with our suppliers to register the components of finished lubricants and greases. Components, not the finished product are required to be registered.

We have appointed Intertek Analyses Chalon as American Refining Group's "Only Representative," as defined under Article 8 of the REACH Regulation - (EC) No 1907/2006 to assist us in completing the pre-registration requirements.

<b>Only Representative Name</b>	<b>Intertek Analyses Chalon</b>
<b>Contact Information</b>	<b>Campus Industriel Grand Chalon Route de Chalon Sur Saone France, 71102 Phone + 33 (0) 385 99 1274</b>

American Refining Group's refinery or blended products do not contain any of the chemicals listed on the European Chemical Association's Candidate listing of Substances of Very High Concern (SVHC), as published on 10/29/08.

If you have any questions, please feel free to contact me.
