1. Identification

Product Name: Grade No.2 Diesel S-15 (On-Road)
Product Code: 8170
Recommended Use: Diesel Fuel
Company: American Refining Group, Inc.
77 North Kendall Avenue
Bradford, PA 16701
www.amref.com
msds@amref.com

Emergency Telephone Number(s):
Chemtrec 1-800-424-9300 (24 HRS)
ARG: 814-368-1297 (24 HRS)

2. Hazards Identification

GHS Classification:
- Germ Cell Mutagenicity Category 2
- Carcinogenicity Category 2
- Aspiration Hazard Category 1
- Inhalation Hazard Category 4
- Skin Corrosion/Irritation Category 2
- Flammable Liquid Category 3

Signal Word: DANGER!

Hazard Statements:
- Suspected of causing genetic defects.
- Suspected of causing cancer.
- May be fatal if swallowed and enters airways.
- Harmful if inhaled.
- Causes skin irritation
- Flammable liquid and vapor

Other Hazard Information:
- Static accumulating liquid can become electrostatically charged even in bonded and grounded equipment
- Sparks may ignite liquid and vapor may cause flash fire.
- Liquid conductivity is <100 pS/m (picosiemens/meter) at 77°F

GHS Pictogram:

Precautionary Statements:
- Obtain special instructions before use.
- Do not handle until all safety precautions have been read and understood.
2. Hazards Identification

Wear protective gloves/protective clothing/eye protection/face protection.

If exposed or concerned: Get medical advice/attention.

Store locked up Dispose of contents/container to in accordance with local/national regulations.

If swallowed: Immediately call a poison center/doctor.

Do NOT induce vomiting.

Avoid breathing dust/fume/gas/mist/ vapors/spray.

Use only outdoors or in a well-ventilated area.

If inhaled: Remove person to fresh air and keep comfortable for breathing.

Wash thoroughly after handling.

If on skin: take off immediately all contaminated clothing. Wash with plenty of soap and water.

If skin irritation occurs: get medical advice/attention.

Take off contaminated clothing and wash before reuse.

Keep away for heat/sparks/open flames/hot surfaces. – no smoking

Keep container tightly closed

Ground/bond container and receiving equipment.

Use explosion proof electrical/ventilating/lighting equipment.

3. Composition / Information on Ingredients

4. First Aid Measures

Eyes

Check for and remove any contact lenses. Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Get medical attention if irritation occurs.

Skin

In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Wash clothing before reuse. Clean shoes thoroughly before reuse. Get medical attention immediately.

Inhalation

Move exposed person to fresh air. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. Loosen tight clothing such as a color, tie, belt or waistband. Get medical attention immediately.

Ingestion

DO NOT INDUCE VOMITING. If conscious, rinse out mouth with water. Seek medical attention immediately.

Symptoms (Acute and delayed)

Exposure to high concentrations of vapors may cause irritation to the eyes, nose and throat, nausea, dizziness and loss of consciousness.

Note to Physicians

No specific treatment. Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.
5. Fire Fighting Measures

Suitable Extinguishing Media
Use dry chemical, CO₂, water spray (FOG) or foam

Unsuitable Extinguishing Media
Avoid solid water stream as it may scatter and spread fire.

Specific Hazards Arising from Chemical
Elevated temperatures can lead to the formation of irritating fumes and vapors. Decomposing products may include the following materials: Carbon dioxide and Carbon monoxide. This product is a static accumulating liquid. Static accumulating liquid can become electrostatically charged even in bonded and grounded equipment. Sparks may ignite liquid and vapor may cause flash fire. Static electricity accumulation may be significantly increased by the presence of small quantities of water or other contaminates. Restrict flow velocity to avoid build-up of static charge. Refer to NFPA 77, API 2003, and CENELEC CLC/TR 50404 for further guidance.

Protective Equipment and Precautions for Firefighters
Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

6. Accidental Release Measures

Personal Precautions
No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.

Environmental Precautions
Prevent product from entering drains. Prevent entry into waterways, sewers, basements or confined areas.

Methods for Containment
Stop leak if without risk.

Methods for Cleanup
A vapor suppressing foam may be used to reduce vapors. Cover liquid spill with sand, earth or other noncombustible absorbent material. Cover powder spill with plastic sheet or tarp to minimize spreading. Pick up and transfer to properly labeled container

7. Handling and Storage

Handling Procedures
Eating, drinking, and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapor or mist. Use only with adequate ventilation. Use non-sparking tools.

Shipping and Storing Procedures
Store in accordance with local regulations. Store in a segregated and approved area. Keep in the original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials. Do not store in unlabeled containers. Store and use away from heat, sparks, open flame or any other ignition source. Take precautionary measures against electrostatic discharges. To avoid fire or explosion, dissipate static electricity during transfer by grounding and bonding containers and equipment before transferring material. Empty containers that retain product residue may be hazardous.

Issue Date: 10 April 2015
7. Handling and Storage

Incompatibilities:

Oxidizing Agents

8. Exposure Controls / Personal Protection

N/A signifies not available

Engineering Controls

This product is a static accumulating liquid. Ground/bond container and equipment. These alone may be insufficient to remove static electricity. Material should be handled in enclosed vessels and equipment. Use only in adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory.

Eye/Face Protection

Chemical goggles and face shield.

Skin Protection

Chemical resistant, impervious gloves complying with an approved standard should be worn at all times. Coveralls, apron, and boots as necessary to minimize contact.

Respiratory Protection

Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicated this is necessary. Respirator selection must be based on known or anticipated exposure levels.

General Hygiene

Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing.

9. Physical and Chemical Properties

*Note: Physical and chemical properties are provided for safety, health and environmental considerations only and may not fully represent product specifications. Please see the Product Specification Sheet for further information.*

10. Chemical Stability & Reactivity Information

- **Reactivity**: Polymerization will not occur
- **Chemical Stability**: Stable under normal conditions. If heated product’s static accumulation will rise and could cause flash fire.
- **Hazardous Reactions**: None, under normal processing.
- **Conditions to Avoid**: High temperatures, flames, sparks
- **Incompatibility**: Strong acids and oxidizing materials
- **Hazardous Decomposition Products**: Smoke, carbon monoxide, carbon dioxide, aldehydes and other products of incomplete combustion.

11. Toxicological Information

- **Acute Exposure**
  - **Respiratory Irritation**: An inhalation hazard may only arise if product is used in aerosol conditions or if heated up. If material is misted or if vapors are generated from heating, exposure may cause irritation of mucous membranes and upper respiratory tract.
  - **Eye Irritation**: May cause eye irritation. Itchiness may occur.
  - **Skin Irritation**: Causes skin irritation. Itchiness and redness varies with exposure.
  - **Sensitization**: Not expected to cause skin or respiratory sensitization.
  - **Aspiration Hazard**: If swallowed can be aspirated into lungs and cause chemical pneumonia, varying degrees of pulmonary injury or death. If swallowed, do NOT induce vomiting.

- **Chronic Exposure**
  - **Target Organ Effects**: No data available to indicate product or components at greater than 1% are chronic health hazards.
  - **Carcinogenicity**: Dermal Carcinogenicity studies indicate that Gas oils and distillate fuels are potential skin carcinogens after repeated skin application but are not associated with the induction of systemic tumors. The skin carcinogenicity of the petroleum streams with high boiling ranges has been demonstrated to correlate with 3-7 ring PAC content. Diesel exhaust fumes are considered carcinogenic by IARC.
  - **Mutagenicity**: Based on in vitro studies, modeled mutagenic index greater than or equal to 1 with metabolic activation; predicts that the sample is mutagenic. Based on in vivo studies, the sample is considered negative for cytogenetic effects.
  - **Reproductive Toxicity**: No data available to indicate either product or components present at greater than .1% that may cause reproductive toxicity.
Teratogenicity
No data available to indicate product or any components contained at greater than .1% may cause birth defects.

Analysis – LD50 / LC50

| Inhalation LC50 Rat | 1.78 mg/L |
| Oral LD50 Rat       | >5000 mg/kg |
| Dermal LD50 Rabbit  | >2000 mg/kg |

13. Disposal Considerations

Disposal Instructions
The generation of waste should be avoided or minimized wherever possible. Treatment, storage, transportation and disposal must be in accordance with applicable Federal, State/Provincial, and Local regulations.

15. Regulatory Information

**SARA Extremely Hazardous Substances (Sections 302 & 304)**
This product does not contain greater than 1% of any “extremely hazardous substances” listed pursuant to Title III of the Superfund Amendments and Reauthorization Act of 1986 (SARA) Section 302 or Section 304 as identified in 40 CFR Part 355, Appendix A and B.

**SARA Section 313**
This product does not contain greater than 1.0% of the substances subject to the reporting requirements of Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 and 40 CFR Part 372.

**SARA Section 311 & 312 Classifications**
- **Acute Hazard**: Yes
- **Chronic Hazard**: Yes
- **Fire Hazard**: No
- **Reactivity Hazard**: No

**CERCLA**
This product does not contain any “hazardous substances” listed under the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA) in 40 CFR Part 302, Table 302.4.

**California Prop 65**
This produces fumes when burnt suspected to contain chemicals known by the State of California to cause cancer and/or birth defects. Moreover, we do not routinely analyze its products for impurities which may be such chemicals.
