

Kendex[®] 0897

(C.A.S. #: 64742-16-1)

Product Code: L10-4555

Kendex[®] 0897 is a medium viscosity, high VI, 100% petroleum resin with practically no measurable asphaltenes. The resin is uniquely characterized by being pourable at room temperatures. It is tacky, non-drying and opaque in color.

Kendex[®] 0897 can be used as key component in quench oils when it is added to the base oil along with other additives, prior to submerging the part for cooling. These characteristics have proven to be beneficial for a wide variety of quench oil applications where protecting the part is foremost and darkening is acceptable.

Kendex[®] 0897 has been widely used with paving grade asphalt to improve both the high and low temperature properties as it extends the malleability of the combined product and helps eliminate "alligatoring". The improved resiliency of the combined product has been demonstrated in paving grade asphalts.

Heating the product will make it easier to remove from the container.

Kendex[®] 0897

Product Description: Light Resins, Lighter Viscosity, Black, Sticky, Penn-Grade Resins

Applications: Viscosity Builder for Metalworking Applications and Modifier for Paving Grade Asphalt

ASTM Method	Description	Specification		
		Minimum	Maximum	Typical
	LB/GAL			7.62
D1298	Gravity, API			23.6
D2161	Viscosity @ 100°C, cSt	40.0	75.0	57.8
D92	Flash Point, °F (°C)	575 (302)		580 (304)
D97	Pour Point, °C (°F)			12 (54)
D1500	Color, ASTM			Opaque

Mixing with incompatible chemicals may be hazardous. This product is for industrial use only. Safety data sheets are available upon request.
